Executive Summary

AI & Machine Learning Engineer with a strong foundation in Data Science, passionate about building intelligent systems that solve real-world problems. Experienced in developing production-ready AI applications, predictive analytics solutions, and end-to-end intelligent systems through academic projects and industry internships. Passionate about transforming complex challenges into practical, scalable solutions that create measurable impact. A fast learner with a problem-solving mindset, eager to contribute to challenging technical roles and grow within a dynamic organization.

Education

Vel Tech University

B.Tech – CSE (AI & Data Science), CGPA: 7.97

Aug 2023 – Jun 2027

Chennai, Tamil Nadu

Professional Experience

Data Scientist Intern

RINEX Technologies

Sep 2025 – Nov 2025

Bangalore

Worked on multiple end-to-end Data Science and Machine Learning projects, applying data preprocessing, exploratory data analysis, feature engineering, predictive modeling, and model evaluation to solve real-world business problems. Collaborated on developing scalable, data-driven solutions while gaining practical experience across the complete machine learning lifecycle—from raw data to actionable insights.

- Built and evaluated multiple machine learning models for predictive analytics.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis on real-world datasets.
- Applied statistical analysis and model evaluation techniques to improve model performance and reliability.
- Developed analytical reports and visualizations to communicate insights effectively to stakeholders.
- Strengthened practical knowledge of end-to-end machine learning workflows and data-driven decision-making.

AI & Embedded Systems Intern

AICTE IDEA Lab – Vel Tech University

May 2026 – Jul 2026

Chennai

Worked on interdisciplinary engineering initiatives combining Artificial Intelligence, Embedded Systems, IoT, Computer Vision, and Software Development to design intelligent solutions for real-world applications. Gained hands-on experience in integrating software with hardware, rapid prototyping, system integration, testing, and deployment of AI-enabled embedded systems.

- Designed and developed AI-powered software and embedded system solutions.
- Integrated sensors, microcontrollers, and AI models into intelligent hardware applications.
- Collaborated on rapid prototyping, testing, and deployment of real-world engineering solutions.
- Applied software engineering principles to bridge AI, hardware, and automation technologies.

Projects

Face Mask Detection | TensorFlow, Keras, OpenCV, CNN | [GitHub](#)

- Built a real-time CNN model on 10,000+ images with data augmentation, achieving 96% validation accuracy for mask/no-mask classification.

Spam Mail Prediction | TF-IDF, Naive Bayes, Logistic Regression | [GitHub](#)

- Built an NLP classifier on 5,500+ emails using TF-IDF vectorisation, achieving 94% accuracy and 97% precision for spam detection.

Superstore Sales Dashboard | Power BI, DAX | [GitHub](#)

- Built an interactive Power BI dashboard with 10+ DAX measures visualising sales of 2.3M INR; identified top 3 loss-making sub-categories driving 28% negative margin.

House Price Prediction | Linear Regression, Scikit-learn, Pandas | [GitHub](#)

- Built a regression model on 21,000+ records achieving $R^2=0.82$ using feature engineering on location, size and amenity data with k-fold cross-validation.

Netflix Data Analysis | Python, Pandas, Matplotlib, Seaborn | [GitHub](#)

- Conducted a comprehensive EDA on 8,000+ Netflix titles, uncovering that 70% of post-2018 additions are Movies; Drama dominates top genre.

Technical Skills

Programming Languages: Python, SQL, Java (Basics)

Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, CNN

Data Science & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Predictive Modeling, Statistical Analysis, Model Evaluation, Data Visualization

Data Engineering: ETL Pipelines, Data Processing, Pandas, NumPy

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Embedded AI & IoT: Arduino UNO, ESP32-CAM, IoT, Sensor Integration, Embedded AI

Tools & Technologies: Git, GitHub, Docker, VS Code, Jupyter Notebook, Google Colab

Certifications

Tata Group — Data Visualisation: Empowering Business with Effective Insights

Sep 2025

Deloitte — Data Analytics Job Simulation

Oct 2025

RapidMiner — Data Engineering Master Certification

Nov 2025

Infosys — Exploring Data Visualization

Feb 2026
